HTML Day 2 Session Guideline

Week two is mostly around introducing the style tag (later we move over to a css file). You can cover things such as:

• Backgrounds from images,
• Font-size:
• Text-decoration:
• Color:
• Div : width, height,
• Border
• Float:
• margin
• HTML Comments,
• Embedding a google map.

You could try to engage the kids by getting them to change colors or decorations them selves. Also might be a good time to show how style is inherited from its container.
